                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        US-09-167-375-13

US-09-167-375-13

Sequence 13, Application US/09167375B

Patent No. 629143B

GENERAL INPORMATION:

APPLICANT: Jul H. Wang

TITLE OF INVENTION: Antiviral anticancer poly-substituted phenyl derivatized oligori;

TITLE OF INVENTION: Antiviral anticancer poly-substituted phenyl derivatized oligori;

TITLE OF INVENTION: Machines for their use.

FILE REPERENCE: WANG 2002 (CITP-1)

Sequence 5646, Application US/08584040
Patent No. 6346319.
Sequence 5646, Application US/08584040
Patent No. 6346319.
APPLICANT: Bavco, Pamela
APPLICANT: Bcokedo, Jaine
TITLE OF INVENTION: METHOD AND REAGENT FOR THE
TITLE OF INVENTION: TREATMENT OF DISEASES OR
TITLE OF INVENTION: CONDITIONS RELATED TO LEVELS
TITLE OF INVENTION: OF VASCULAR ENDOTHELIAL
TITLE OF INVENTION: OF VASCULAR ENDOTHELIAL
TITLE OF INVENTION: OF ORGANIA PACTOR
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         MEDIUM TYPE: Storage
COMPUTER: IBM Compatible
OPERATING SYSTEM: IBM P.C. DOS 5.0
SOFTWARE: Word Perfect 5.1
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/584,040
FILING DATE: January 11, 1996
CLASSIFICATION DATA:
APPLICATION NUMBER: 60/005,974
PRIOR APPLICATION DATA:
APPLICATION NUMBER: 60/005,974
FILING DATE: October 26, 1995
ATTORNEY/AGENT INFORMATION:
NAME: WALLOUGY RICHARD AS 73,327
REFERENCE/POCKET NUMBER: 32,327

S-09-371-772B-623
Sequence 623, Application US/09371772B
Patent No. 6566127
GENERAL INFORMATION:
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Riscond, Dan
APPLICANT: Stinchcomb, Dan
APPLICANT: Recobed, Jaime
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
CURRENT APPLICATION NUMBER: US 60/005,974
FRIOR FILING DATE: 1999-08-10
FRIOR FILING DATE: 1999-01-02
FRIOR FILING DATE: 1996-01-08
NUMBER OF SEQ ID NOS: 14225
SOPTWARR: PatentIn version 3.0
SEQ ID NO 623
LENGTH: 17
                                                                                                                                                                                                                                                                       Sequence 383, Application US/0937172B

US-09-371-772B-5266/C

Sequence 5266, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Pavco, Pam

APPLICANT: Riswigen, Jim

APPLICANT: 1990-0, Jaine

TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor

FILE REFERENCE: MEBBO, 876-J (237/198)

CURRENT FILING DATE: 1999-08-10

PRIOR FILING DATE: 1999-08-10

PRIOR FILING DATE: 1996-01-08

NUMBER OF SEQ ID NOS: 14225

SOFTWARE: Patentin version 3.0

SEQ ID NO 5266

LEMOTH: 17

Sequence 792, Application US/08373124A

Patent No. 564604

GENERAL INFORMATION:
APPLICANT: Stinchcomb, Dan T.
APPLICANT: Draper, Kenneth
APPLICANT: McSwiggen, James
APPLICANT: Jarvis, Thale
TITLE OF INVENTION: WETHOOS AND COMPOSITIONS FOR
TITLE OF INVENTION: TREATERN OF RESTENOSIS AND
TITLE OF INVENTION: CANCER USING RIBOZYMES
NUMBER OF SEQUENCES: 2627
CORRESPONDENCE ADDRESS:
ADDRESSEE: Lyon & Lyon
STREET: 633 West vif.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   1081 AAGAATTTGGAAAATA 1097

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Sequence 214.7, Application US/08435628
| Patent No. 581776
| GENERAL INFORMATION:
| APPLICANT: Stinchcomb, Dan T.
| APPLICANT: Braper, Kenneth
| APPLICANT: Marylagen, James
| APPLICANT: Marylagen, Thale
| TITLE OF INVENTION: TRAINENT OF RESTENOSIS AND
| TITLE OF INVENTION: CANCER USING RIBOZYMES
| NUMBER OF SEQUENCES: 2627
                               APPLICANT: Jarvis, Thale
TITLE OF INVENTION: METHODS AND COMPOSITIONS FOR
TITLE OF INVENTION: METHODS AND COMPOSITIONS FOR
TITLE OF INVENTION: TREATMENT OF RESTENOSIS AND
TITLE OF INVENTION: CANCER USING RIBOZYMES
NUMBER OF SEQUENCES: 2627
CORRESPONDENCE ADDRESS:

RESULT 353
UG-08-435-628-2151
Sequence 2151, Application US/08435628
Patent No. 5817736
GENERAL INFORMATION:
APPLICANT: Stinchcomb, Dan T.
APPLICANT: Stinchcomb, Dan T.
APPLICANT: Diavis, Tanes
APPLICANT: Diavis, Thale
TITLE OF INVENTION: TREATMENT OF RESTENOSIS AND
TITLE OF INVENTION: TREATMENT OF RESTENOSIS AND
TITLE OF INVENTION: CANCER USING RIBOZYMES
NUMBER OF SEQUENCES: 2627
CORRESPONDENCE ADDRESS:
ADDRESSEE: Lyon & Lyon
STREET: SAILE 4700
```

Patent No. 581776
GENERAL INFORMATION:
APPLICANT: Stinchcomb, Dan T.
APPLICANT: Draper, Kenneth
APPLICANT: Wiswiggen, James
APPLICANT: Waswiggen, Sand
TITLE OF INVENTION: CANCER USING RIBOZYMES
NUMBER OF SEQUENCES: 2627
CORRESPENDENCE ADDRESS:
ADDRESSEE: Lyon & Lyon
STREET: Suite 4700
CITY: Los Angeles
STREET: California
COUNTRY: U.S.A.
ZIP: 99071
OPERATING SYSTEM: IBM P.C. DOS S.O SOFTWARE: Word Perfect 5.1
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/435,628
FILING DATE: 05-MAY-1995
CLASSIFICATION: 514
PRIOR APPLICATION NUMBER: 08/373,124
FILING DATE: January 13, 1995
APPLICATION NUMBER: 08/245,466
FILING DATE: January 13, 1995
APPLICATION NUMBER: 08/245,466

| Sequence 15, Application US/09502710
| Patent No. 6300133
| GENERAL INFORMATION:
| APPLICANT: DINDBO, John A. |
| APPLICANT: TURBEW, Thomas H. |
| TITLE OF INVENTION: RNA TRANSFORMATION VECTORS DERIVED FROM TITLE OF INVENTION: RNA UNCAPPED SINGLE-COMFONENT RNA VIRUS FILE REFERENCE: 008010137US13 |
| CURRENT APPLICATION NUMBER: US/09/502,710 |
| PRIOR FILING DATE: 200-02-11 |
| PRIOR FILING DATE: 1999-07-21 |
| PRIOR FILING DATE: 1999-07-21 |
| PRIOR PLICATION NUMBER: 09/359,301 |
| PRIOR PLICATION NUMBER: 09/359,305 |

Sequence 2827, Application US/08584040

Patent No. 634638

GENERAL INFORMATION:
APPLICANT: Favoro, Pamela
APPLICANT: Stinchcomb, Dan T.
APPLICANT: Stinchcomb, Dan T.
APPLICANT: Estobedo, Jaimes
TITLE OF INVENTION: WETHOD AND REAGENT FOR THE
TITLE OF INVENTION: TREATMENT OF DISEASES OR
TITLE OF INVENTION: CONDITIONS RELATED TO LEVELS
TITLE OF INVENTION: OF VASCULAR ENDOTHELIAL
TITLE OF INVENTION: GROWTH FACTOR
NUMBER OF SEQUENCES: 8502
CORRESPONDENCES: 8502
CORRESPONDENCES: ADDRESS:
ADDRESSEE: Lyon & Lyon
STREET: 633 West Ffith Street
STREET: 631 West Ffith Street
STREET: Callfornia
COUNTRY: Los Angeles

APPLICANT: Lawlis, Virgil B
TITLE OF INVENTION: Heterologous Polypeptides Expressed in Filamentous Fungi, Proces
TITLE OF INVENTION: Heterologous Polypeptides Gor Making Same
FILE REFERENCE: A-42909-5
CURRENT APPLICATION NUMBER: U8/09/468,265
CURRENT PLING DATE: 1999-12-10
PRIOR APPLICATION NUMBER: 08/284,942
PRIOR FILING DATE: 1995-06-07
PRIOR FILING DATE: 1995-09-25

Sequence 2.7. Application US/09468265

Patent No. 6379928

GENERAL INFORMATION

APPLICANT: Berka, Randy M

APPLICANT: Cullen, Daniel

APPLICANT: Cullen, Daniel

APPLICANT: Hayenga, Kirk J

TITLE OF INVENTION: Heterologous Polypeptides Expressed in Filamentous Fungi, Process

TITLE OF INVENTION: Heterologous Polypeptides Expressed in Filamentous Fungi, Process

TITLE OF INVENTION WHEER: US/09468,265

CURRENT FILING DATE: 1990-02-26

PRIOR PILING DATE: 1998-02-26

PRIOR PILING DATE: 1998-03-29

SOFTWARE: Patentin Version 3.1
